ANNOUNCEMENT
A new Working Group on “Medical Physics Education for the non-physics healthcare professions”
CALL FOR MEMBERS

EFOMP hereby announces a new Working Group (WG) entitled “Medical Physics Education for the non-physics Healthcare Professions”. The WG will operate under the Education and Training Committee from 20th of January 2022 to 31st December 2022.

The rationale of the WG: Medical Physicists teach the non-physics Healthcare Professions. However there has never been a proper definition of the role, and no policy document exists to guide role holders. Hence there is no harmonisation across Europe.

The chair of the WG is Carmel Caruana (MT).

The expected outcome is EFOMP Policy Statement no 18: Medical Physics Education for the non-physics Healthcare Professions.

The targeted audience are EFOMP members, and the medical physics community in general. The deadline to establish the WG is 20th January 2022. NMOs are kindly asked to distribute this announcement to their members.

Nomination must be made through the NMO (no self-nominations are allowed). A professional CV is required.

The term for accepting nominations is from 1st December 2021 to 14th January 2022. Nominations must be made electronically using the enclosed form.

Send your WG membership applications here:
