ETRAP

27-30 June, 2023

Groningen, The Netherlands

International Conference on Education and Training in Radiation Protection

Registration is open – early bird deadline 28 February 2023

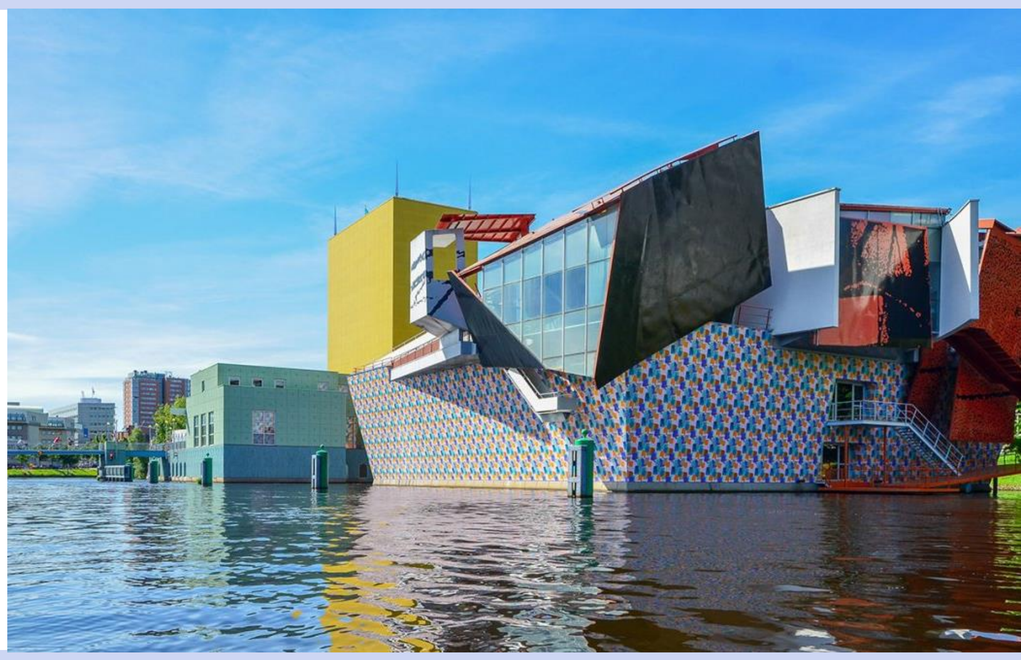
ETRAP 2023 intends to bring together training providers, academics, policy makers, radiation protection professionals, regulators and authorities, and end-users of education and training in radiation protection.

It offers the opportunity for learning and discussing about the latest findings and developments in education and training in radiation protection and facilitates networking amongst the different stakeholders.

We invite you to send in abstracts reflecting the following themes:

- Competence standards for trainers
- Online and hybrid learning: innovation and experiences gained
- Competence based systems vs. qualification based systems
- Attracting and preserving a competent workforce
- Integration of social sciences and humanities and public engagement

Abstracts should reach us not later than 31 January 2023 via **www.etrap.net**



The 8th ETRAP conference will be hosted by the Groningen Academy for Radiation Protection in the Academy building of the University of Groningen, in the historical center of the city. Registration is open now! Take advantage of the early bird fee at **www.etrap.net/registration**.

This conference is organized by University of Groningen and SCK CEN, in cooperation with IAEA, EUTERP and IRPA, and with support of EFOMP, HERCA, IRPA-YG, BVS-ABR, NVS, FANR, CEA-INSTN, Technical University Madrid and Leibniz University Hannover.

Also in Groningen! EUTERP Workshop 2023

The 9th EUTERP Workshop will run immediately prior to the ETRAP conference, 26-27 June. For details see www.euterp.eu. Combined registration is possible.
