Definition of the different roles/positions in the Working Group.

An EFOMP WG has a limit of 10 members and this includes the WG chair.
There is no limitation for the number of consultants and observers.

Member
A WG member is a full member of the WG. Full members do the necessary literature study, analysis of data and write the reports, statements, policies of the WG. You may say, they are the working horses. This all happens under the direction of the WG chair. WG members have the highest influence on the process and they decide on the output of the WG.
The funding of the WG is spent on the WG members in the case of life meetings (travel and accommodation).

Consultant
A WG consultant is involved in the WG process, but from a distance. They may help the WG when asked, and they may give advice whenever appropriate. WG consultants have some influence on the output of the WG.
WG consultants are not entitled for financial compensation.

Observer
A WG observer fulfills the most passive role. WG observers will be informed about the steps taken by the WG and may evaluate preliminary reports when provided by the WG chair. They are not supposed to interfere in the WG process.
WG observers are not entitled for any financial compensation.
