

Since 2013, alongside EFOMP and IOMP, The Romanian College of Medical Physicists (CFMR) together with the Department of Physics from the University of Oradea are celebrating IDMP via a symposium dedicated to the medical physics profession.

**November 7**  
INTERNATIONAL DAY OF  
MEDICAL PHYSICS

6 REGIONAL ORGANIZATIONS 86 NATIONAL MEMBER ORGANIZATIONS +25000 MEDICAL PHYSICISTS

This year, as in all the previous years, we expect a large number of participants, including high school students, science teachers, medical physics students and professionals. Throughout the years our focus was to promote medical physics as a field of science and a possible career path among the young generations, closely collaborating with science teachers. The poster and oral presentations presented at our symposium are all along the theme of IDMP, which this year concentrates on the multinational collaborations and the interdisciplinary nature of medical physics: "It's a medical physics world". Indeed, it is!

*Loredana Marcu, President of the Romanian College of Medical Physicists (CFMR)*
